Tru-D[®] SmartUVC

Available via L1 DLA ECAT Contract #SPE2DH-17-D-0007

Validated by multiple independent studies & clinic trials, Tru-D SmartUVC is a portable UVC disinfection system that delivers an automated, measured dose of UVC light to disinfect an ENTIRE room during one cycle from a single placement. *

Differentiators

- Ensures 99.9 percent pathogen reduction in direct and in shadowed areas*
- Independent studies/clinical trial: Cleveland VAMC, Yale, Duke, UNC, etc.
- Single position, single cycle operation. No repositioning
- Compensates for room size, shape, colors, textures, and furniture/equipment
- Room disinfection data documented for tracking, trending, and analysis
- First Tru-D sold in 2007 still in use. No Tru-D has been replaced by a competitive device

Sample Use Locations: Operating room, patient room, sterile processing, lounges, locker rooms, restrooms, community living centers/nursing homes, AND MANY MORE

Randomized Clinical Trial: Research team chose Tru-D *"because its automated system is proven to significantly reduce environmental pathogens and eliminate human error in the disinfection process."*

Daniel Sexton, M.D., Duke Infection Control Outreach Network
